

CREATE YOUR OWN AUTOCAD WORKSPACE

Create your own AutoCAD Workspace

You can change the appearance by activate/deactivate workspace elements by typing in command line.

To close the ribbon:

Type RIBBONCLOSE then enter.

To open the menu bar:

Type MENUBAR then enter. Enter value 1 then enter again.

To open a toolbar:

It's easier to show one toolbar then choose other toolbars by right clicking above it.

1. Type -TOOLBAR then enter (notice the - prefix).
2. Type DRAW to show draw toolbar, enter. Or any other toolbar you wanted to show.
3. Type S to show it, enter.

Now you will see draw toolbar. Right click above the toolbar to choose other toolbars to show. Show all necessary toolbars and arrange them as you wish. After you finish, click workspace button at status bar. Click "Save Current As.." and give this new workspace a name as you created..
